**#fundraisingBC007MEcfs** is a **fundraising campaign by ME/CFS sufferers** to enable a drug trial of BC007 at University Hospital Erlangen, Dr. Dr. Hohberger.

Long Covid patients have already been treated successfully in initial tests of the drug BC007. This medication eliminates a group of specific autoantibodies which exist in ME/CFS patients likewise. Unfortunately, there is **no government research funding** for ME/CFS. Therefore, we need **€800,000** for a therapy study of BC007 in ME/CFS patients.

**With your donation you can help to make this study possible!**

Donation Recipient: **Brückeverbindet e.V.**  
IBAN: **DE43 1005 0000 0191 0769 61** BIC: **BELADEBEXXX**  
Purpose: „**BC007 for ME/CFS**“

- In Germany, there are currently about **300,000 ME/CFS** sufferers, including 40,000 children and adolescents without any help.
- **100% of the donations will be transferred to University Hospital Erlangen** for the implementation of the study „BC007 in ME/CFS“.
- **BC007** is a drug that has already succeeded as a cure in Long Covid patients.
- To reach the **fundraising goal, €800,000** is needed.
